

Girls Inc. Project: Satisfaction in 2026 Program Surveys

Alex Hirth & Henry Kuerbis

Project Goals and Data

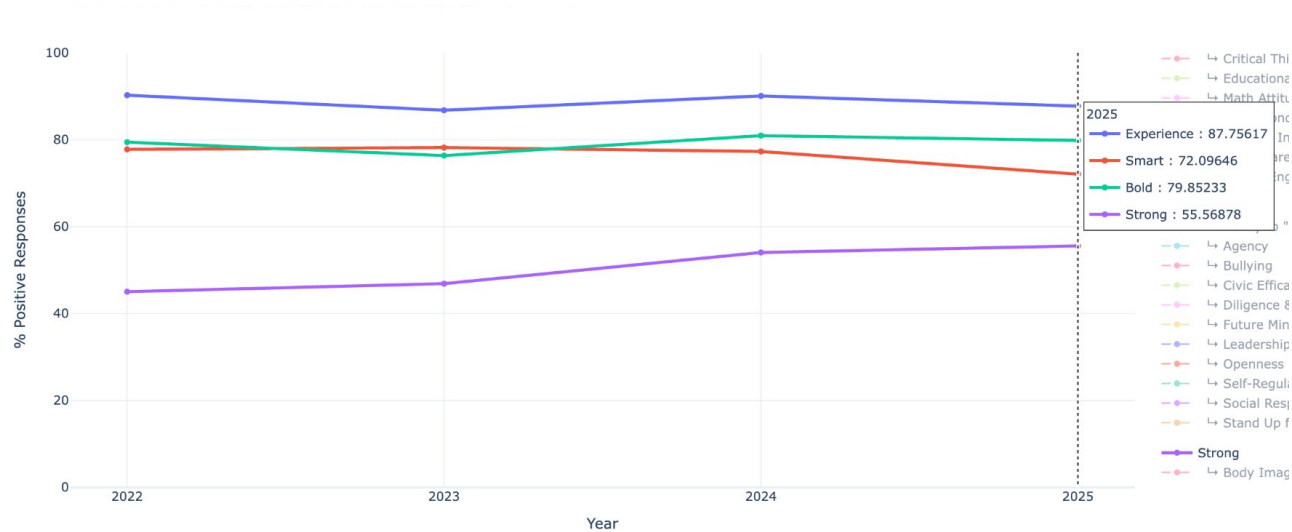

- Collect satisfaction data from SSBOS surveys across categories and subcategories
- Observe trends from 2022 to 2025
- Compare Trends from Previous Years to Recent Program Surveys

% Positive Responses by Category & Subcategory (2025)

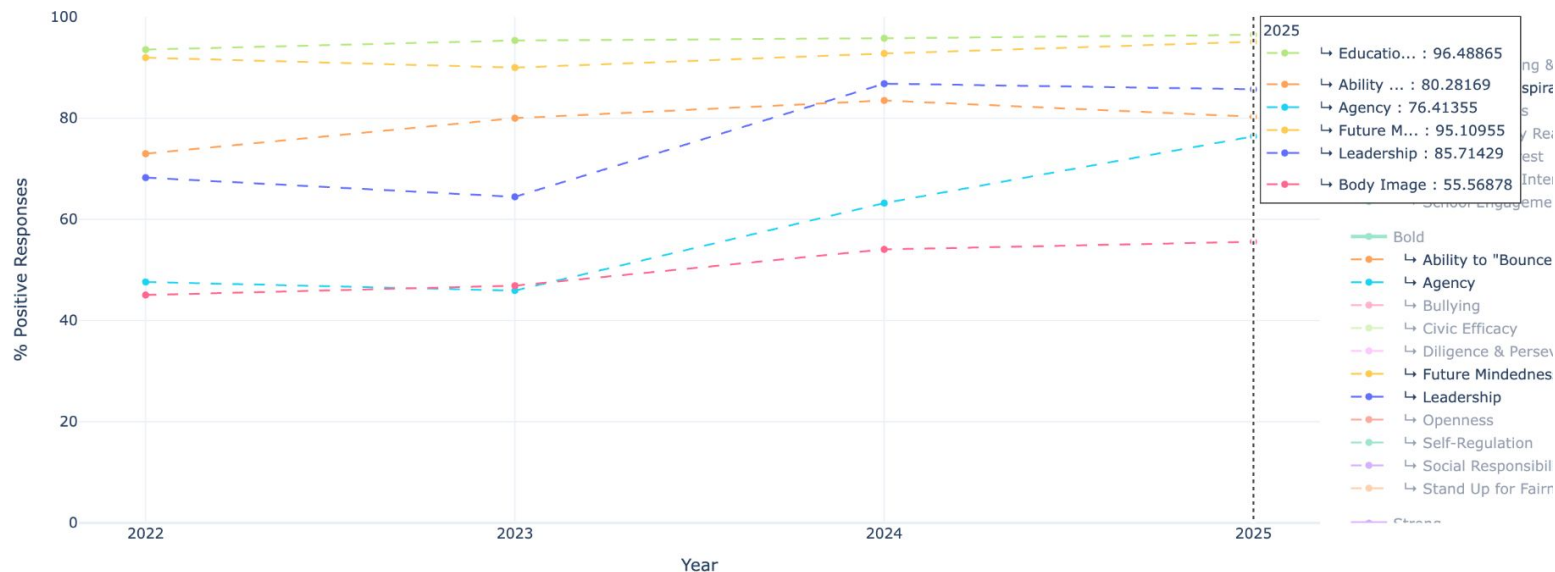

- Experience Overall has Highest Positive Responses Across Programs
- Smart Overall has Lowest Positive Responses

Satisfaction Over Time: Main Categories

- Strong is consistently trending positive (45-56%)
- Smart has a 5 point drop (77-72%) between 2024-2025
- Experience and Bold are Stagnant

Satisfaction Over Time: Positive Trends

- Biggest Increases are Leadership (68.3-85.7%) and Agency (47.6-76.4%)
- Body Image has Trended Positive But Remains Low in 2025 (55.5%)
 - 2026 Survey Data from After School Program Shows 90.6% Positive for Body Image

Satisfaction Over Time: Stagnant Trends

- Reading (80.8-73.5%) and Math (74.8-63%) Decline After 2024
 - “I am Good at Math” is 83.3% in 2026 Eureka Survey
- Post-Secondary Readiness (67.8-74.7%) Improved Between 2024 and 2025
 - Eureka Survey Showed a 3 Point Increase in 2026

Satisfaction Over Time: Volatile Trends

- Matching School Engagement Questions were 94.6% Positive in Afterschool Survey (19 Point Increase).

Satisfaction Over Time: Negative Trends

- Critical Thinking (89.6-73.7%), Diligence (77.3-66.4%), and STEM (59-49.9%) from 2024-2025 Which is Consistent with Other Academic Questions
 - STEM Related Questions Scored 77.1% on 2026 Eureka Survey
- Social Confidence Categories like Pro-Girl (92.2-85.5%), Bullying (92.8-84.4%), and Standing Up for Fairness (82.8-70.3%) trended negative
 - This Remains Consistent with the Confidence Related Data from 2026 Program Surveys

Program Effectiveness

(2025 SSBOS to 2026 Program Surveys)

Girls in...

- **Eureka**
 - Had improved attitudes towards math which had been stagnate (63% to 83.3%).
 - Felt increased postsecondary readiness which had also stagnated.
 - Were more interested in STEM careers which had been trending down. (49.9% to 77.1%)
- **Afterschool**
 - Had much more positive body images. (55.5% to 90.6%).
 - Were more engaged in school. (75.1% to 94.6%).
- **Wellness**
 - Reported a drop in self-regulation ability. (67.3% to 54.2%).

Thank You
